Face Shields Market Growth & Trends

The global face shields market size is expected to reach USD 1.3 billion by 2030 according to a new report by Grand View Research, Inc., expanding at a CAGR of 7.2% over the forecast period. The market is primarily driven by reasons such as increased awareness as a result of the COVID-19 pandemic, severe rules relating to personnel safety, and rising awareness about industrial occupational risks.

The market has prospered from the Covid-19 pandemic. This is mostly due to an increase in the demand for face shields, which prevent or reduce the spread of life-threatening Covid-19 infections. The expanding number of community-acquired illnesses, particularly respiratory infections, has driven the need for and demand for face shields.

The aging population's increased health concerns and unhealthy lifestyles are expected to increase the demand for healthcare services. As a result, it is anticipated that demand for medical equipment and supplies will increase throughout the projected period. This in turn has fueled the demand for personal protective equipment, such as face shields.

Rising healthcare spending in numerous countries is likely to boost demand for face shields throughout the predicted period. Furthermore, growing healthcare infrastructure in emerging countries, along with an increasing number of individuals seeking healthcare services, is expected to support market growth throughout the forecast period.

Face shields are commonly utilized in a variety of healthcare settings. It has played an important role in safeguarding healthcare staff and patients from cross-contamination and pathogen transmission, it has been made essential and recommended throughout the healthcare industry. The growing healthcare industry is expected to drive the face shields market demand over the forecast period.
