### **Filling Machines Market Growth & Trends**

The global filling machines market size is expected to reach USD 12.72 billion by 2030, according to a new report by Grand View Research, Inc., expanding at a CAGR of 4.1% from 2022 to 2030. The market is expected to expand as a result of the increase in packaging machinery applications in a variety of industries, including healthcare, food & beverage, cosmetics, and others where packaging has become crucial.

The market for filling machines has been severely impacted by the COVID-19 outbreak. The consumption rate of packaged goods is declining as a result of the health risks associated with Covid-19, which puts financial stability at risk and reduces global demand for these devices.

The primary driver fueling the growth of the market is the rising purchasing power parity of consumers. Additionally, the market for filling machines is anticipated to grow as a result of the growth of numerous industries and the rising adoption of automatic and sophisticated machinery.

In the upcoming years, the market for filling machines is anticipated to expand due to the rising demand for packaged and processed foods. The processed and packaged

food industry is undergoing significant transformation as a result of shifting customer preferences for processed and packaged foods, changing demographic trends, and other social, political, and economic factors.

The market is one of the prominent industries showcasing significant growth associated with the global packaging machine market in terms of revenue. The market is highly influenced by government standards and high-quality demand. The industry is expected to gain political prominence owing to high machinery standards.

The filling machine manufacturers are seeking collaborations, mergers, and acquisitions to expand their product lines and increase production capacity. Manufacturers are also focusing on increasing their manufacturing facilities in order to accommodate rising demand from critical end-use industries such as food & beverages, chemicals, and pharmaceutical.

#### Filling Machines Market Report Highlights

The aseptic product segment is expected to register the fastest growth rate over the forecast period. The demand for aseptic filling machines is increasing as they are flexible and minimize waste and product loss when compared to a manual process

The rotary product segment is expected to grow in the years to come. Due to its simplicity of integration with already existing machinery such as sorting and capping, it is frequently employed in application industries

The automatic mode of operation segment is expected to expand at a lucrative CAGR of 4.8% from 2022 to 2030. Packaging companies can create more owing to automatic filling equipment than they could by manually filling products

The beverages application segment held the largest share of over 35.0% in 2021. The filling machine segment is essential to the beverage industry because it provides appropriate beverage handling for mass production

In April 2022, At Anuga FoodTec in Cologne, Germany, KHS Group showcased its portfolio of cutting-edge filling technologies and eco-friendly packaging systems. KHS's InnoPET BloFill ACF-L block system for aseptic filling is part of the portfolio
