Abstracts

The global floating substation market size was valued at USD 374.7 million in 2025 and is projected to grow from USD 449.6 million in 2026 to USD 1,861.6 million by 2033, at a CAGR of 22.5% from 2026 to 2033. Europe dominated the market, accounting for a revenue share of 45.5% of the global market in 2025. Market growth is driven by the rapid expansion of floating offshore wind projects in deep water areas, increasing demand for reliable offshore power transmission, and advancements in platform and substation technologies, with government support and grid infrastructure investments further creating new opportunities for expansion.
