### Foam Dressing Market Growth & Trends

The global foam dressing market size is anticipated to reach USD 2.5 billion by 2030, according to a new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 4.7% from 2022 to 2030. A few of the key drivers propelling the market growth include an increase in surgical cases, a rapidly aging population, and an increase in the number of diabetes patients. For instance, according to the World Economic Forum, the current population of Japanese people above 65 years of age is 25% of the total population. This number is further expected to rise to 40% by 2060. Older people are more likely to sustain wounds, thus, the market for foam dressing is expected to grow throughout the forecast period.

An increase in the number of obese/overweight people is another fueling factor of the market. For instance, according to an article by Sage Journals & Indian Academy of Neurosciences, 2021, the number of obese people in India is estimated to be 135 million. Similarly, as per the Obesity Evidence Hub, two-thirds of the Australian people, i.e., 35.6% are overweight, whereas, 31.3% are expected to be obese. These situations are anticipated to raise demand for bariatric treatments and other related surgeries, driving the growth of the market over the anticipated time frame.

Additionally, the industry is anticipated to grow in the upcoming years with the launch of the COVID-19 vaccine and the relaxation of lockdown restrictions. It is anticipated that many elective procedures will be performed that were delayed. Moreover, many top producers are engaged in strategic activities including new launches, partnerships, and geographic expansion that could enable them to profit from the rising demand for foam dressing products during the projection period. For instance, in February 2022, Medline Industries announced the launch of a new version of its foam dressing Optifoam Gentle EX Foam Dressing. This is specially designed to displace the pressure whenever used with a pressure injury prevention protocol. Thus, similar initiatives by other market players are anticipated to boost market growth during the post-pandemic time.
