Feminine Hygiene Products Market Growth & Trends

The global feminine hygiene products market size is anticipated to reach USD 49.0 billion by 2030, according to a new report by Grand View Research, Inc. It is anticipated to register a CAGR of 7.6% over the forecast period. The growth is catapulted by the rise in disposable income, awareness among women regarding the available solutions, and commercialization of innovative and eco-friendly products. Initiatives by companies, government agencies, and self-help groups have resulted in raising awareness among women about various menstrual hygiene and sanitary products.
