Abstracts

The global grid interoperability market size was valued at USD 7.2 billion in 2025 and is projected to grow from USD 7.9 billion in 2026 to USD 18.4 billion by 2033, at a CAGR of 12.9% from 2026 to 2033. Asia Pacific dominated the market, accounting for the largest revenue share of 38.5% in 2025. The market is driven by the growing integration of renewable energy, increasing adoption of distributed energy resources, grid modernization initiatives, and the need for seamless communication and coordination between diverse grid assets.

Rising deployment of smart grid technologies, electric vehicles, energy storage systems, and digital grid management solutions is further increasing demand for interoperability. Growing grid complexity and the need to maintain reliability and stability are also encouraging utilities to adopt solutions that enable different equipment, platforms, and systems to exchange data and operate efficiently.
