## **Abstracts**

The Hong Kong nutraceuticals market size was estimated at USD 3.67 billion in 2024 and is projected to reach USD 6.56 billion by 2033, growing at a CAGR of 6.6% from 2025 to 2033. The market growth is primarily fueled by factors such as the increasing use of functional beverages among sports professionals, surging demand for immunity boosters from young urban consumers, and rising inclusion of nutraceuticals into ongoing health management strategies.

Growing health awareness and the lasting impact of COVID-19 have been contributing to the consumption of nutraceuticals nationwide. A survey commissioned by the Hong Kong Health Food Association and conducted by CUHK in 2024 found that 62.9% of adults took health supplements in the past six months, equating to about 3.9 million individuals. It projected a half-year consumer spending of USD 2.38 billion (HK\$18.5 billion) on supplements. Increased purchases post-pandemic were reported by 23% of respondents, and a rising focus on immune health was reported by nearly 29.8% of respondents.

Moreover, the rapidly aging population and heightened consumer interest in vitamins, probiotics, and traditional Chinese supplements have created a demand for nutraceuticals in the country. According to an article published by South China Morning Post Publishers Ltd in February 2025, Hong Kong's aging population is expanding steadily. As of 2023, about 22% of the 7.5 million population were 65 years or older, a significant increase from the previous year. These factors are expected to drive the

growth of the Hong Kong nutraceuticals market.

## Global Hong Kong Nutraceuticals Market Report Segmentation

This report forecasts revenue growth at the country level and provides an analysis of the latest industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the Hong Kong nutraceuticals market report based on product, application, and distribution channel:
