Hong Kong Office Supplies Market Trends

The Hong Kong office supplies market size was valued at USD 484.8 million in 2024 and is anticipated to grow at a CAGR of 1.8% from 2025 to 2030. Hong Kong is one of the key strategic locations for global industry due to its highly developed economy, close link to Mainland China, modern infrastructure capabilities, and presence of multiple international companies. Considered a major hub for regional and global trade, tourism, and financial sector activities, Hong Kong is likely to generate novel opportunities for the office supplies market.

The presence of multiple corporate offices established by multinational companies to oversee regional business operations and provide strong support to the company's business in China is likely to develop significant demand for office supplies, including paper and desk supplies. These products range from paper stationery to desk organizers: prepared glues, non-toxic imported inks, sustainable paper, and others.

In recent years, multiple companies have opened newly developed offices in Hong Kong. For instance, in 2024, SCHURTER Global, one of the global manufacturers of electronics and electrical components, moved its Asia Pacific headquarters from Singapore to Hong Kong. In 2025, it opened its new office in Hong Kong to reinforce its

commitment to a strategic focus on the regional market.

Hong Kong has been attracting various industries to set up offices, including financial services, state-owned investment funds, global welfare organizations, and others. Its infrastructure excellence, supportive regulatory framework, and business-friendly environment have attracted multiple international organizations. For instance, in 2022, the Public Investment Fund, a sovereign wealth fund of Saudi Arabia, announced opening new subsidiaries and offices in New York, London, and Hong Kong.

To share more examples, in September 2024, PUMA, one of the international sporting goods and consumer products brands, opened its new office in Hong Kong for global sourcing and local commercial teams. Increase in new establishments by multinational companies and rising demand for office supplies that complement the routine operations of the corporate sector are expected to drive the growth of this market from 2025 to 2030.
