Hydrotherapy Equipment Market Growth & Trends

The global hydrotherapy equipment market size is expected to reach USD 3.8 billion by 2027 registering a CAGR of 4.2%, according to a new report by Grand View Research, Inc. Increasing awareness about therapeutic hydrotherapy, especially after post-surgery or cardiovascular procedures, is expected to drive the market. The hydrotherapy equipment are used for stress-relieving, cancer patient rehabilitation, managing skin conditions, and musculoskeletal disorders, among others.

The demand for hydrotherapy for pain management is on the rise due to increasing cases of spinal cord and orthopedic injuries. Various organizations are undertaking initiatives by offering hydrotherapy pools for public use to increase treatment awareness and adoption. The associations, such as the World Federation of Hydrotherapy and Climatotherapy (FEMTEC), are conducting events, such as symposiums and conferences, to bring together the healthcare community for the promotion of hydrotherapy.

Cardiovascular rehabilitation practices also implement hydrotherapy for the effective recovery of the patient. Aquatic Cardiac Rehabilitation (ACR) is an aerobic exercise program conducted in a swimming pool for promoting cardiorespiratory fitness in patients with pulmonary disease or coronary atherosclerotic disease, who are unable to undertake land-based rehabilitation due to orthopedic limitations. Moreover, hydrotherapy provides advantages like reduced risk of Cardiovascular Diseases (CVD)

and increased myocardial perfusion.

Hydrotherapy Equipment Market Report Highlights
