Large Molecule Bioanalytical Technologies Market Growth & Trends

The global large molecule bioanalytical technologies market size is expected to reach USD 13.9 billion by 2028, according to a new report by Grand View Research, Inc. The market is estimated to expand at a CAGR of 13.5% from 2021 to 2028. The demand for bioanalytical testing services has significantly increased over the past few years, thereby positively impacting the growth of the market.

This is primarily due to the growing R&D activities in the biopharmaceutical industry, leading to notable investments in the space. Also, the ongoing pandemic of COVID-19 has resulted in the expansion of manufacturing and R&D capabilities of key stakeholders leading to increased demand for bioanalytical testing services. The use of advanced technologies in vaccine and cell gene therapy development has led to significant growth of this space.

Advancements in instrumentation have created lucrative opportunities for contract manufacturers. Over the past several years, biopharmaceutical manufacturers are outsourcing at least some part of their biomanufacturing activities. Analytical testing is one of the most outsourced activities as it requires highly specialized personnel and equipment to conduct assays. These factors are anticipated to play a vital role in

shaping market growth.
