These organizations have undertaken several initiatives for safe drug delivery. Some of the programs conducted by these organizations are needle & syringe programs; prevention & treatment of sexually transmitted infections; targeted information; and education & communication for Injecting Drug Users (IDUs) and their sexual partners.

The COVID-19 pandemic had a positive impact on the market due to the increasing demand for vaccines to reduce the mortality rate and to control the severity of the virus in patients with the risk of being infected with it.
