The global ligation devices market size is expected to reach \$1.4 million by 2026 according to new report by Grand View Research, Inc., registering a 6.32% CAGR over the forecast period. The market is primarily driven by the increasing incidence of digestive system related diseases and increasing adoption of minimally invasive procedures. Technological advancements in the field of endoscopy which require ligation devices is also expected to drive the growth. Moreover, increasing healthcare spending in the field of gastrointestinal procedures is also fueling the market. Rise in the geriatric population prone to various digestive and chronic diseases is projected to contribute to the rising demand. According to the National Institutes of Health, in 2015, there were 617 million people over the age of 65 years and the number is projected to reach 1.6 billion by 2050.

Increasing use of ligation devices in open surgeries such as coronary artery bypass, aortic valve replacement, and mitral valve replacement is expected to propel growth of the ligation devices market. According to the Society of Thoracic Surgeons Adult Cardiac Surgery Database, in U.S., 156,931 Coronary Artery Bypass Grafting (CABG) procedures were performed, in 2016. In addition, favorable reimbursement policies along with rising R&D expenditure is also adding to the growth of the market.

Further key findings from the report suggest:

Europe captured second position in the ligation devices market in 2018, supported by favorable reimbursement policies, availability of ligation devices, and various government initiatives

By product, accessories segment accounted for the largest market share in 2018, owing to low cost and high usage of the product

By applier, reusable appliers are projected to continue dominating in near future owing to the rising use in both minimally invasive and open procedures

By application, gastrointestinal and abdominal surgery segment captured the largest market share in 2018, owing to increasing prevalence of age-related digestive diseases

Based on procedure type, minimally invasive procedures segment accounted for the largest market share of more than 65% in 2018 and is expected to maintain its dominance during the forecast period

Few of the leading market players are Medtronic Plc; Johnson and Johnson (Ethicon); the Cooper Companies, Inc.; CONMED Corporation; B Braun Melsungen AG; Teleflex Incorporated; and Olympus Corporation. These players are focusing on new product launches to provide advanced services to the patients. In August 2019, Medtronic Plc confirmed the re-availability of its two product codes FF107- ligation clip applier, and FFL112-ligation clip applier
