Abstracts

The global mass timber engineering products market size was valued at USD 10.3 billion in 2025 and is projected to grow from USD 10.9 billion in 2026 to USD 16.7 billion by 2033, at a CAGR of 6.3% from 2026 to 2033. North America dominated the market, accounting for a revenue share of 36.4% in 2025. The industry is expanding as construction stakeholders increasingly adopt engineered wood systems as alternatives or complements to conventional concrete and steel structures.

Products such as cross-laminated timber (CLT), glued laminated timber (glulam), laminated veneer lumber (LVL), nail-laminated timber (NLT), and dowel-laminated timber (DLT) provide structural strength, dimensional stability, prefabrication capability, and lower structural weight. Demand is supported by growing interest in reducing embodied carbon, improving construction efficiency, and integrating renewable materials into residential, commercial, institutional, and infrastructure projects.

Market opportunities are increasing as mass timber moves beyond low-rise applications into mid-rise and taller buildings. Expanded building code provisions in major construction markets have improved the feasibility of taller timber structures, while prefabricated panels and digitally controlled manufacturing enable accurate off-site production and faster on-site assembly. The combination of structural performance, reduced construction time, and design flexibility is creating opportunities for

manufacturers to provide engineered products alongside fabrication, engineering, and project support capabilities.

Technology and product development are increasingly focused on automated manufacturing, CNC machining, digital building-model integration, fire-resistant assemblies, optimized connections, and hybrid timber systems. Manufacturers are also investing in production capacity and process automation to improve dimensional accuracy, material utilization, and manufacturing consistency. The growing use of prefabricated mass timber components is further supporting integration with modular and off-site construction approaches.

Global Mass Timber Engineering Products Market Report Segmentation

This report forecasts revenue growth at the global, regional & country levels and provides an analysis on the industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global mass timber engineering products market report on the basis of product type, application, building type, and region:

Product Type Outlook (Revenue, USD Billion, 2021 - 2033)

Cross-Laminated Timber (CLT)

Glue-Laminated Timber (Glulam)

Nail-Laminated Timber (NLT)

Laminated Veneer Lumber (LVL)
