### Medical Carts Market Growth & Trends

The global medical carts market size is expected to reach USD 9.11 billion by 2030 by exhibiting a CAGR of 16.87% during the forecast period, according to a new report by Grand View Research, Inc. An increase in the adoption of electronic medical records (EMR) in hospitals is expected to drive the medical carts market. The growth of the market can also be attributed to the increasing demand for efficient care delivery and patient engagement solutions in healthcare facilities.

Rising incidence of work-related musculoskeletal injury (MSI) among medical and nursing staff is anticipated to propel the demand for mobile medical carts over the forecast period. Furthermore, advancements in clinical workstations such as battery-powered systems with locking drawers and touchscreen communication channels are contributing to the increase in demand for these products over the forecast period.

### Medical Carts Market Report Highlights

By product, mobile computing carts accounted for the largest share in 2016 owing to increased application in healthcare facilities, such as medical documentation, equipment delivery, dispensing of drugs, and telehealth services

Mobile computing carts can be powered and nonpowered. The powered segment is expected to witness lucrative growth in the coming years due to benefits such as portability

By type, emergency carts held the majority in 2016 owing to various technological advancements such as improved mobility, lighter weight designs, and enhanced ergonomics

Hospitals are the largest end users of medical carts. This can be attributed to the increasing incidence of work-related MSIs among hospital staff and the spread of infectious diseases

Companies are focusing on product launches and innovation to cater to differentiated demand from consumers. They are also offering cost-efficient care delivery solutions to stay ahead

For instance, in October 2015, Ergotron, Inc. launched the SV10 series of Styleview Medical Carts to improve its revenue share.
