## **Abstracts**

The global medical flexible packaging market is expected to reach USD 34.62 billion by 2025, according to a new report by Grand View Research, Inc. The growing demand for medical devices and implants coupled with innovation in packaging materials is driving the demand for these products.

Flexible packaging provides many advantages as it is lightweight, has increased shelf life, and consumes less amount of material. Medical flexible packaging products are expected to experience increased demand over the forecast period owing to the presence of a wide variety of offerings that cater to specific purposes. The development of eco-friendly high strength paper is expected to further augment the market demand.

North America was the largest regional market in 2016 backed by the thriving medical device and implant manufacturing industries. The presence of advanced medical device manufacturers with specialized packaging needs is expected to drive the demand for these products. The improving economic outlook and growing innovation on barrier materials are expected to have a positive impact on the consumption in North America. The presence of major companies such as Amcor and Bemis is expected to further boost the consumption over the forecast period.

Further key findings from the report suggests:
