Microdermabrasion Devices Market Growth & Trends

The global microdermabrasion devices market size is expected to reach USD 984.7 million by 2030, registering a CAGR of 8.6%, according to a new report by Grand View Research, Inc. Growing cases of skin-related conditions is a major factor driving the market growth. Moreover, high demand for anti-aging treatments due to the growing geriatric population will boost the market. Increasing demand for cosmetic procedures is also anticipated to fuel market growth.

For instance, according to the American Society of Plastic Surgeons article, Americans spent nearly at least USD 16.5 billion on minimally invasive procedures and cosmetic plastic surgeries in 2018, which reflects a nearly 4% increase from 2017. Moreover, many cosmetic and plastic procedures are performed as a combination of more than one procedure, thus driving the market growth. In addition, the introduction of new products for the treatment of various skin disorders is estimated to augment the market growth in future. Some of the key companies in the global microdermabrasion equipment market are Silhouet-Tone, Dermaglow, Koninklijke Philips N.V., and Skin for Life.
