## **Abstracts**

### Middle East Air Curtains Market Summary

The Middle East air curtains market size was estimated at USD 54.2 million in 2024 and is projected to reach USD 81.3 million by 2033, growing at a CAGR of 4.7% from 2025 to 2033. The industry is driven by the region's expanding commercial infrastructure, including shopping malls, airports, and hospitality projects.

Governments across the GCC are investing heavily in smart city development, which boosts the adoption of energy-efficient building solutions. Rising retail activity and the growth of quick-service restaurants are further fueling adoption, as air curtains enhance customer comfort while preventing dust, insects, and outdoor heat from entering facilities. Industrial and healthcare sectors are also adopting these systems to maintain hygiene standards and temperature stability. With extreme climatic conditions in the Middle East, particularly high summer temperatures, air curtains are becoming an essential part of modern building designs. These trends are ensuring steady market growth.
