Middle East Extrusion Machinery Market Summary

The Middle East extrusion machinery market size was estimated at USD 350.5 million in 2024 and is projected to reach USD 473.6 million by 2033, growing at a CAGR of 3.5% from 2025 to 2033. The market is witnessing steady growth, driven by rising demand across construction, packaging, and industrial applications.

Extrusion machinery is widely used in producing plastic pipes, films, sheets, and profiles that serve as essential inputs for infrastructure, consumer goods, and industrial manufacturing. The region's construction boom, led by large-scale residential, commercial, and infrastructure projects in the GCC, continues to fuel demand for extruded building materials such as window frames, facade systems, and conduit piping.

Parallel growth in regional plastics consumption and downstream fabricating capacity is expanding demand for higher-throughput, automated extrusion systems that reduce labor and energy costs. Manufacturers are therefore prioritizing machines with improved energy efficiency, faster changeover and integrated quality-control features to match contractor timelines and specification requirements.
