Middle East Hazardous Waste Management Market Summary

The Middle East hazardous waste management market size was estimated at USD 677.1 million in 2024 and is projected to reach USD 1,175.9 million by 2033, growing at a CAGR of 6.4% from 2025 to 2033, driven by increasing industrialization, stricter environmental regulations, and rising awareness of sustainable waste disposal practices. Countries like Saudi Arabia, the UAE, and Qatar are investing heavily in infrastructure and oil and gas projects, generating large volumes of hazardous waste that require proper handling.

Government initiatives aligned with Vision 2030 and green economy goals are pushing industries to adopt safer and more efficient waste treatment and disposal methods.

Additionally, the growth of sectors such as chemicals, healthcare, and manufacturing has heightened the demand for specialized hazardous waste services. Public-private partnerships, technological advancements in waste treatment, and regional collaborations are also playing a key role. As environmental compliance becomes more critical, the market is expected to see steady investment, regulatory support, and increased participation from both local and international players.
