Middle East Modular Chillers Market Summary

The Middle East modular chillers market size was estimated at USD 145.4 million in 2024 and is projected to reach USD 245.6 million by 2033, growing at a CAGR of 5.9% from 2025 to 2033. The growth is attributed to rising demand for energy-efficient cooling solutions in commercial, residential, and industrial sectors.

Rapid urbanization, infrastructure development, and expanding construction activities in countries like the UAE, Saudi Arabia, and Qatar are driving the need for advanced HVAC systems. Increasing awareness about environmental sustainability and government initiatives promoting energy conservation are encouraging the adoption of modular chillers, which offer higher efficiency and flexibility compared to traditional systems. Additionally, harsh climatic conditions in the region create a constant need for reliable and effective cooling solutions.

The integration of smart technologies and advancements in energy-saving designs further enhances the appeal of modular chillers. Growing investments in green building projects and the push toward reducing carbon footprints are expected to continue fueling market growth in the Middle East over the forecast years.
