### Middle East Peelable Seal Market Summary

The Middle East peelable seal market size was estimated at USD 289.3 million in 2024 and is expected to reach USD 464.0 million by 2033, expanding at a CAGR of 5.4% from 2025 to 2033. The market is driven by rising demand for convenient and hygienic packaging in dairy, ready meals, and fresh produce, supported by the region's expanding food processing industry.

In addition, government focus on food safety standards and increasing adoption of sustainable lidding solutions further fuel market growth. Increasing urbanization, rising disposable incomes, and the growing influence of Western dietary habits are fueling the consumption of ready-to-eat meals, dairy products, and beverages. Peelable seals provide secure yet easy-to-open solutions for yogurt cups, bottled beverages, and snack packs. For instance, in Saudi Arabia and the UAE, the demand for single-serve dairy products like flavored yogurts and cheese snacks has surged, directly boosting the uptake of peelable lidding films and resealable packaging formats.

The Middle East's expanding healthcare sector is creating demand for sterile, tamper-evident, and user-friendly packaging. Peelable seals are widely used in medical device packaging, blister packs, and pharmaceutical pouches, offering contamination prevention while enabling easy access for patients and healthcare workers. For example, the UAE and Qatar are investing heavily in advanced healthcare

infrastructure, with pharmaceutical imports growing significantly. This has increased the need for peelable seals in blister packs, IV fluid bags, and diagnostic kits, where both safety and convenience are critical.

E-commerce and food delivery services are expanding rapidly in the Middle East, driven by younger demographics and digital adoption. Peelable seals offer the durability and convenience required for online food and grocery deliveries, ensuring that products remain fresh, secure, and easy to consume. In markets like the UAE, where food delivery platforms such as Talabat and Deliveroo are thriving, peelable reseal films are being used for ready meals, snacks, and beverage packaging to meet consumer expectations for convenience. In addition, the region's growing demand for portable, single-portion packs in airports, malls, and workplaces further supports the demand for peelable seals.
