Middle East Skin Boosters Market Trends

The Middle East skin boosters market size was estimated at USD 61.5 million in 2024 and is projected to reach USD 150.8 million by 2033, growing at a CAGR of 10.4% from 2025 to 2033. This growth is driven by the surging demand for minimally invasive aesthetic procedures, heightened skin health awareness, and the strong impact of social media beauty trends. Expanding medical tourism, especially in the UAE and Saudi Arabia, along with innovations in injectable skincare, is accelerating market uptake. Rising disposable incomes and the availability of experienced dermatologists further support long-term growth. Notably, Dubai, recognized as the plastic surgery capital of the Middle East, boasts the world's highest density of cosmetic surgeons, with 47 per million population.

The market is also benefiting from the rise of A-Beauty (Arab Beauty), a trend inspired by K-Beauty and J-Beauty, which emphasizes native ingredients suited for the hot, dry climate. Brands such as Asteri Beauty cater to these needs with hydration-focused and protective formulations, aligning with local consumer preferences.

Countries such as the UAE, Oman, Kuwait, Bahrain, and Qatar are emerging as key hubs for medical aesthetics due to their robust healthcare infrastructure, strategic government initiatives, and cultural acceptance of cosmetic enhancements. Dubai leads the Arab Medical Tourism Index (MTI), supported by flagship projects like Dubai

Healthcare City (over 168 clinical facilities) and initiatives such as the Dubai Health Experience (DXH). Abu Dhabi follows with top-tier hospitals such as Burjeel Hospital and an e-portal simplifying patient access. Oman, ranking third in the MTI, is advancing under its Health Vision 2050 with mega projects like the Sultan Qaboos Medical City. This strong medical tourism ecosystem directly boosts demand for premium aesthetic services, including skin boosters.
