Abstracts

The global military nitrocellulose market size was valued at USD 198.6 million in 2025 and is expected to grow from USD 212.8 million in 2026 to USD 344.6 million in 2033, at a CAGR of 7.1% from 2026 to 2033. Europe dominated the global market, accounting for a revenue share of 36.7% in 2025. The market growth is supported by increasing demand for nitrocellulose as a key energetic material in small-arms propellants, artillery ammunition, military explosives, and other defense applications, particularly due to its high energy content, controlled burning characteristics, compatibility with propellant formulations, and ability to support consistent ballistic performance.

Rising defense spending, modernization of military ammunition, expansion of small-arms and artillery capabilities, and increasing requirements for reliable energetic materials are driving demand for military-grade nitrocellulose. Nitrocellulose is primarily used as a key energetic component in smokeless powders, propellants, ammunition, and other military applications, where controlled combustion, energy output, stability, and consistent ballistic performance are critical. Growing procurement of small-caliber ammunition, artillery systems, and other defense platforms is supporting demand for high-quality nitrocellulose with controlled nitrogen content and consistent physical and chemical properties. Increasing focus on ammunition reliability, propellant performance, domestic defense production, and secure supply chains is also encouraging manufacturers to invest in advanced nitrocellulose production and processing

capabilities. The expansion of defense manufacturing capacity across Asia Pacific, Europe, North America, and other emerging defense markets, together with efforts to strengthen indigenous ammunition supply, is further shaping market development.

Global Military Nitrocellulose Market Report Segmentation

This report forecasts revenue & volume growth at the global, regional & country levels and provides an analysis of the latest industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global military nitrocellulose market report based on grade, propellant type, application, and region:

Grade Outlook (Volume, Kilotons; Revenue, USD Million, 2021 - 2033)

High-Nitrogen (?13.0% N)

Medium-Nitrogen (12.0-12.9% N)

Low-Nitrogen (<12.0% N)

Propellant Type Outlook (Volume, Kilotons; Revenue, USD Million, 2021 - 2033)

Single-Base

Double-Base
