## **Abstracts**

The global mini chainsaw market size was estimated at USD 328.7 million in 2025 and is projected to reach USD 618.8 million by 2033, growing at a CAGR of 8.5% from 2026 to 2033. The market is expected to grow significantly due to rising demand for lightweight, portable, and easy-to-operate cutting tools across residential, gardening, and small-scale agricultural applications.

Increasing urban gardening trends, landscaping activities, and do-it-yourself (DIY) home improvement projects are encouraging consumers to adopt compact battery-powered chainsaws. Technological advancements such as cordless designs, improved lithium-ion batteries, enhanced safety features, and low noise operation are further supporting market expansion.

In addition, growing awareness of efficient tree maintenance and pruning solutions among homeowners and professional gardeners is boosting product adoption. Expanding e-commerce distribution channels and affordable product availability are also enabling wider market penetration, particularly in emerging economies, contributing to sustained market growth over the forecast period.
