The global no-code AI platforms market size was estimated at USD 4.28 billion in 2024 and is projected to reach USD 44.15 billion by 2033, growing at a CAGR of 30.2% from 2025 to 2033. The rising demand for business process automation and intelligent workflows is significantly accelerating the adoption of no-code AI platforms.

Organizations across industries are prioritizing operational efficiency, cost optimization, and data-driven decision-making, which requires rapid deployment of AI capabilities without long development cycles.

The rapid evolution and deployment of AI and machine learning worldwide contribute to market growth. Technologies such as automated machine learning are gaining popularity as they are designed for firms that lack ML competence. In addition, the adoption of IoT, edge computing, and data science solutions and services has increased across numerous industries, further boosting the market growth. Overall, no-code AI platforms assist in reducing defects, improving delivery time, and making data science more practical, providing lucrative prospects for market growth during the forecast period.

No-code AI solutions empower business users to automate repetitive tasks, generate insights, and build predictive models independently, reducing pressure on IT teams and improving time-to-value. As enterprises increasingly pursue digital transformation and seek agility and innovation, the ability of no-code AI platforms to support faster

experimentation and streamlined AI integration becomes a crucial driver of market growth.
