North America Ambulance Services Market Growth & Trends

The North America ambulance services market size is expected to reach USD 40.64 billion by 2030, according to a new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 10.08% from 2022 to 2030. Rising incidence of chronic ailments such as cardiovascular disorders, diabetes, and cancer is a key factor expected to drive ambulance services market growth.

For instance, according to the American Heart Association, in January 2019, stroke is the leading cause of death in the U.S. approximately 2.7 million people in the country living with atrial fibrillation, and approximately 800,000 people experience a stroke each year due to a blockage in the blood vessel that supplies blood to the brain. Moreover, CDC states that 34.2 million people of all ages, or 10.5% of the US population had diabetes in 2018.

Furthermore, growth in the geriatric population and a surge in traumatic accidents are further driving the market growth. Additionally, there has been a constant increase in the number of traumatic accidents in this region. For instance, according to the National Highway Traffic Safety Administration estimates, in 2021, about 42,915 people died in motor vehicle traffic crashes, a 10.5% surge from the 38,824 fatalities in 2020. The

industry is expanding due to favorable reimbursement regulations in developed countries.

In the U.S., Medicare covers both emergency and non-emergency ambulance services for medically necessary emergencies, provided the supplier satisfies certain criteria. In some circumstances, Medicare also covers unplanned and irregular non-emergency visits. Medicare pays approximately 80.0 percent of the cost of emergency services, with the remaining 20% paid by the patient's insurance coverage.

North America Ambulance Services Market Report Highlights

On the basis of transport vehicle, the ground ambulance segment dominated the market with a share of 48.87% in 2021. This can be attributed to their effectiveness and high usage rates

Based on emergency services, the emergency services segment is projected to witness the fastest growth rate of CAGR of 10.50% during the forecast duration, owing to the high prevalence of cardiovascular diseases such as cardiac arrest, stroke, and congestive heart failure

On the basis of equipment, advance life support ambulance is expected to dominate in 2021, and is projected to witness the fastest growth over the forecast period, owing to an increase in technologically advanced equipment and skilled employees, increased awareness of life support services

The U.S. is expected to dominate the ambulance services in 2021 with a share of more than 89%, owing to favorable reimbursement policies and regulatory reforms and growing demand for high-quality healthcare facilities
