North America DIY & Household Adhesives And Sealants Market Growth & Trends

The North America DIY & household adhesives and sealants market is anticipated to reach USD 1.78 billion by 2030, expanding at a CAGR of 3.5% from 2024 to 2030, according to a new report by Grand View Research, Inc. The surge in home renovation activities in the North America has significantly boosted the demand for adhesives and sealants, which are essential for ensuring the durability and functionality of renovation projects.

Silicone product category improvers are projected to generate USD 458.0 million worth of revenue cumulatively from 2024 to 2030, growing at a CAGR of 3.9%. This is attributed to the Liquid silicones having a very low surface tension, which allows them to easily cover many surfaces, even those with very low surface energy such as Polytetrafluoroethylene (PTFE).

Paste forms are projected to generate USD 727.1 million worth of revenue cumulatively from 2024 to 2030, growing at a CAGR of 3.8%. Paste form offers a robust and durable bond for wood, metal, glass, and plastic materials. The paste form is easy to apply, allowing for precise application with minimal mess and filling gaps for a smooth finish.

Water-based adhesives are projected to generate USD 566.7 million by 2030, growing at a CAGR of 3.7%. Water-based adhesives are versatile in terms of usage and offer advanced bonding for a wide range of applications across various industries. These adhesives are made using water, polymers, and additives, and work well with porous or non-porous surfaces. They can be applied as solutions and are activated as water evaporates or absorbed by the substrate.

Wood surface type segment is projected to generate USD 714.0 million worth of revenue by 2030, growing at a CAGR of 4.0%. The selections of adhesive and sealants used for woods, include wood glues, epoxies, and polyurethane-based products designed to withstand wood's natural expansion and contraction. These adhesives and sealants provide strong bonds and offer features like water resistance and quick drying times, making them ideal for indoor and outdoor applications.

Cartridges segment is projected to generate USD 840.8 million by 2030, growing at a CAGR of 3.7%. Cartridges available in the market come in various sizes and can be used with mixing nozzles to ensure the correct mix ratio and thorough blending of two-part formulations. They can be designed for manual or pneumatic dispensing. Nozzles, caps, and plungers are also available to improve the dispensing capabilities of cartridges.

Kitchen & Fixtures segment is expected to register the highest penetration, reaching USD 723.6 million by the end of 2030, at a CAGR of 3.8%. Adhesives and sealants for the DIY and household sectors are engineered for seamless integration, allowing users to achieve professional-level results in attaching or sealing countertops, sinks, and cabinetry.
