### North America MRO Distribution Market Growth & Trends

The North America MRO distribution market size is expected to reach USD 188.5 Billion by 2030, registering a CAGR of 2.5%, according to a new report by Grand View Research, Inc. Increasing product penetration in the manufacturing industry on account of standardization of critical services and equipment is expected to drive the market growth. Moreover, increasing product demand from other end-use industries is also likely to support market growth. The periodic maintenance, repair, and overhaul (MRO) activities help reduce overall costs and enhance the productivity of the industrial operations, which is expected to drive their demand.

The MRO distribution or supply chain was traditionally considered an indirect component of industrial operations. The lack of focus and investments in MRO processes in the past resulted in the slow growth of the industry. However, the recent global pandemic has contributed to raising awareness regarding crisis management of the supply chain in the manufacturing industry, which is expected to benefit the market growth. The value chain of this market includes manufacturers, specialists, generalists, partnerships, integrated supply, and retailers. Manufacturers play a major role across the value chain, by possessing definitive control over the market as they monitor the product pricing. They usually command pricing on a customer-by-customer basis rather

than on a distributor-by-distributor basis.
