Oil & Gas SCADA Market Size & Trends

The global oil & gas SCADA market size was estimated at USD 3.73 billion in 2023 and projected to grow at a CAGR of 5.7% from 2024 to 2030. The market is driven by several key factors that are expected to shape its growth trajectory over the next few years. One of the primary drivers is the increasing demand for real-time information and operational efficiency in the oil and gas industry.

Another significant driver is the growing investments in refineries and pipelines, particularly in regions like the Americas, Africa, the Middle East, and Asia-Pacific. The exploration of new oil and gas fields and the expansion of existing infrastructure require advanced monitoring and control systems, which SCADA systems provide. This trend is expected to continue, driven by the need to meet increasing domestic oil consumption demands and to maintain export capabilities.
