### Orthodontic Consumables Market Growth & Trends

The global orthodontic consumables market size is expected to reach USD 4.03 billion by 2030, according to a new report by Grand View Research, Inc., registering a CAGR of 5.9% over the forecast period. The specialty of orthodontics is dentofacial augmentation. The field of orthodontics is associated with adjusting the lower and upper jaws to line up as they close. The requirement for orthodontic consumables is growing due to the increase in dentofacial augmentation procedures. The most common issues that fall under the orthodontics field of dentistry include crooked teeth, teeth that are positioned incorrectly, and a problem where the jaws don't close together properly. In addition, orthodontics restores dental aesthetics and guards against periodontal disease and tooth decay.

The drivers that are most likely to spur industry growth are highlighted in in-depth research on the orthodontic consumables industry and the rising prevalence of disorders. Growing cases of malocclusion, a dental problem that affects nearly 50% to 75% of people in major industrialized countries, the aging population and their increasing need for dental care, and the rising demand for cosmetic dentistry are all anticipated to play a significant role in this development. In addition, it is projected that improvements in dentistry, the popularity of preventative orthodontics, and growing

public awareness about the need for oral health care will all help positively shift the demand curve. It would create a more lucrative market segment in the near future.

Dental problems increase with malocclusion, most importantly, periodontal diseases, which are identified as one of the leading problems faced by many people. People suffering from periodontal diseases are more prone to develop heart diseases and diabetes, among other conditions that are likely to drive the industry. The industry has been negatively impacted by the COVID-19 pandemic. Many dental treatments and operations were initially put on hold as a result of the lockdown and international limitations that were implemented in a majority of the countries. The COVID-19 outbreak has severely disrupted the medical industry's supply chain. There are several worries concerning the accessibility of dental services and guaranteeing the safety of dentists. However, in 2021, many offices and clinics around the world are reopened and the market demand is likely to grow during the forecast period.

#### Orthodontic Consumables Market Report Highlights

The brackets segment dominated the global industry in 2021 due to the fact that brackets are the most commonly used orthodontic consumables

The most profitable sub-segment of the bracket segment is the self-ligating bracket and is likely to grow further in the future

The dental clinics segment is expected to witness a significant CAGR during the forecast period. A rising number of dental clinics and a high level of procedures performed in the clinics are likely to fuel the segment growth

North America dominated the global industry in 2021 owing to a rise in the U.S. population, technological advances in dentistry, and the increasing coverage by dental insurance plans

Asia Pacific is expected to register the fastest CAGR in the forecast period owing to the growing patient population, rising awareness about aesthetic procedures, and rapid technological advancements
