### Peripheral Nerve Stimulators Market Summary

The global peripheral nerve stimulators market size was estimated at USD 271.79 million in 2024 and is projected to reach USD 680.30 million by 2033, growing at a CAGR of 10.89% from 2025 to 2033. The rising prevalence of chronic pain disorders, increasing preference for minimally invasive and non-opioid therapies, and continuous advancements in neuromodulation technologies are the primary driving factors contributing to the growth of the industry.

The rising prevalence of chronic pain disorders is one of the key driving factors of the peripheral nerve stimulators industry. Conditions like neuropathic pain, migraines, and post-surgical pain often cause long-term disability, while traditional treatments such as opioids carry risks of addiction and limited efficacy. For instance, according to recent data published by Brain Research UK, the following facts and statistics highlight the burden of neurological conditions in the UK:
