Abstracts

The global pet tech products market size was estimated at USD 9.23 billion in 2025 and is projected to reach USD 23.54 billion by 2033, growing at a CAGR of 12.5% from 2026 to 2033. The global pet tech industry is primarily driven by rising pet ownership, increasing pet humanization, and higher spending on pet health and wellness.

Advances in digital technologies such as AI, IoT, and mobile apps are enabling smarter products for monitoring, feeding, and caring for pets. In addition, busy lifestyles and demand for convenient, connected pet care solutions continue to accelerate market growth.

The shift toward urban living has encouraged the use of automated feeding, monitoring, and engagement solutions. The shift has an increasing demand for proactive pet care and real-time tracking of pet health and behavior. Wider availability through digital retail platforms has made pet tech products more accessible. Ongoing technological innovation and investment continue to fuel market expansion. In April 2024, Petlibro Inc. introduced the Polar Wet Food Feeder, a smart refrigerated cat feeder that uses semiconductor cooling and a companion app to keep wet food fresh for up to 72 hours and automate scheduled meals. The device features three compartments, Wi-Fi control for feeding schedules, and notifications for offline status, aiming to solve freshness and spoilage issues for wet food while owners are away.

Moreover, the market is driven by an aging pet population that requires more frequent

monitoring and specialized care solutions. Shortages of veterinary professionals are encouraging the adoption of remote diagnostics and tele-vet technologies. Integration of pet devices with smart home ecosystems is also boosting demand for connected solutions. In addition, the growing use of data analytics to personalize pet care is supporting market growth.
