## Abstracts

The global pleasure motor catamaran (60-90 ft) market size was estimated at USD 654.3 million in 2024, and is projected to reach USD 1,099.1 million by 2033, growing at a CAGR of 6.0% from 2025 to 2033. Driven by the increasing demand for luxury recreational boating, rising disposable incomes, and the growing popularity of marine tourism and leisure activities.

In addition, technological advancements such as improved fuel efficiency, hybrid propulsion systems, and enhanced onboard comfort and automation features are attracting a wider customer base. The expanding charter and yacht rental market, coupled with coastal infrastructure development in regions such as the Mediterranean, Caribbean, and Asia-Pacific, is further propelling market growth.

The surge in global coastal and marine tourism activities is significantly boosting the market growth of pleasure motor catamarans. According to the European Commission's Blue Economy Report, the coastal and maritime tourism sector has recorded steady expansion, supported by increased traveler interest in ocean-based recreation and investments in marina infrastructure across coastal economies. Similarly, the U.S. National Oceanic and Atmospheric Administration (NOAA) reports a strong rebound in marine recreation sectors, with boating and charter operations contributing notably to coastal GDP. This renewed enthusiasm for ocean leisure travel, complemented by luxury yacht charter growth, is boosting the demand for pleasure motor catamarans, valued for their superior comfort, stability, and capacity to accommodate families or small groups. As coastal nations continue to prioritize tourism recovery and waterfront development, the trend is expected to propel the overall market growth in the coming years.

The consistent increase in recreational boating participation across major boating nations is propelling the market expansion of pleasure motor catamarans. The U.S. Coast Guard's Recreational Boating Statistics highlight a rise in registered leisure vessels and active boating participants, driven by rising disposable incomes and lifestyle shifts toward outdoor leisure activities. Governments are also supporting this momentum through marine safety campaigns, harbor expansion projects, and grants that improve boating accessibility. These initiatives are driving the demand for user-friendly and spacious boats, particularly motor catamarans that deliver enhanced stability, fuel efficiency, and onboard amenities. As boating becomes an increasingly popular family and lifestyle activity, this participation surge continues to boost the market growth of motor catamarans worldwide.

Ongoing technological advancements and a global shift toward sustainable propulsion systems are driving the market growth of pleasure motor catamarans. Research and funding initiatives by the U.S. Department of Energy and the European Maritime Safety Agency (EMSA) are accelerating the adoption of hybrid-electric and low-emission propulsion technologies across the marine industry. Manufacturers are increasingly incorporating lightweight composite materials, energy-efficient hull designs, and solar-assisted systems to reduce operational costs and carbon emissions. In addition, the integration of digital navigation, automation, and smart monitoring technologies enhances comfort and safety for users. As governments tighten emission regulations for marine crafts, the rising adoption of eco-friendly, technologically advanced catamarans is propelling the market growth globally.

The rapid expansion of the global yacht charter and rental services industry is boosting the market demand for pleasure motor catamarans. Government-supported tourism initiatives across coastal economies, such as Australia's Department of Climate Change, Energy, the Environment and Water (DCCEEW) and the European Commission's coastal tourism programs, emphasize the growing economic importance of marine-based recreation. Charter operators are increasingly investing in motor catamarans due to their high passenger capacity, low fuel consumption, and luxury accommodation features, ideal for multi-day leisure cruises and tourism charters. Moreover, marina upgrades and simplified vessel licensing frameworks introduced by local governments are propelling the market expansion as more consumers opt for shared or rental-based boating experiences. This evolving travel and leisure pattern is expected to continue boosting the market growth in the near future.

The implementation of stricter environmental and safety regulations is propelling the

market modernization of the global pleasure motor catamaran industry. The International Maritime Organization (IMO) and the U.S. Environmental Protection Agency (EPA) have both introduced updated standards on marine engine emissions and fuel quality to reduce environmental impact. Similarly, the U.S. Coast Guard continues to strengthen safety compliance frameworks for recreational vessels, covering navigation systems, life-saving equipment, and structural stability. These policy advancements are driving the market growth by encouraging manufacturers to invest in cleaner propulsion technologies, safer hull architectures, and integrated monitoring systems. Consequently, regulatory enforcement is not only ensuring environmental sustainability but also boosting the market demand for advanced and compliant pleasure motor catamarans.

### Global Pleasure Motor Catamaran Market Report Segmentation

This report forecasts revenue and volume growth at the global, regional, and country levels and provides an analysis of the latest industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global pleasure motor catamaran market report based on region.
