### **Portable Power Station Market Size & Trends**

The global portable power station market size was estimated at USD 0.69 billion in 2024 and is expected to grow at a CAGR of 17.0% from 2025 to 2030. The increasing demand for clean, renewable sources of energy is expected to benefit the market growth.

As consumers become increasingly environmentally conscious, the appeal of portable power stations that utilize solar or other renewable energies has significantly risen. These devices offer an eco-friendly alternative to traditional gasoline or diesel generators, aligning with the global shift towards sustainable living. Additionally, energy or power requirements during natural calamities are likely to act as a key contributing factor.
