

Rigid Endoscopes Market Size, Share & Trends Analysis Report By Product (Laryngoscopes), By Angle Of View, By Product Dimension (

Abstracts

The global rigid endoscopes market size was estimated at USD 7.7 billion in 2025 and is projected to reach USD 11.1 billion by 2033, growing at a CAGR of 4.7% from 2026 to 2033. The increasing prevalence of cancer and cancer-related mortality globally is one of the factors expected to drive the market growth.

For instance, according to the American Cancer Society article published in January 2025, an estimated 2,041,910 new cancer cases are expected to be diagnosed in the U.S. in 2025, with approximately 618,120 cancer-related deaths projected during the year. With the prevalence of cancer rising globally, there is a growing need for effective diagnostic and treatment procedures. Endoscopes play a crucial role in offering minimally invasive options to accurately diagnose, stage, and treat various forms of cancer.
