### **Rigid Plastic Packaging Market Trends**

The global rigid plastic packaging market size was valued at USD 243.42 billion in 2024 and is expected to grow at a CAGR of 3.2% from 2025 to 2030. Rising demand for packaged food on account of growing preference towards ready to eat food products and increased adoption of plastic as a material in rigid packaging products are expected to support growth of rigid plastic packaging market.

The U.S. market for rigid plastic packaging is anticipated to experience consistent growth, fueled by a rising need from the food and beverage industry for packaging that is durable, tamper-proof, and lightweight. The expansion of e-commerce and retail is expected to further enhance the demand for protective and ready-to-shelf rigid containers, particularly for personal care, pharmaceutical, and electronic goods.

Furthermore, the growth of e-commerce and retail distribution channels is anticipated to drive the need for protective and stackable rigid packaging formats, especially in industries like personal care, pharmaceuticals, and electronics. These sectors depend significantly on packaging that can endure the stresses of transportation while

preserving brand aesthetics.

In addition, regulatory requirements set by organizations such as the FDA and EPA are encouraging businesses to implement compliant, high-performance rigid plastics for the safe storage and distribution of consumables and delicate products. These regulations are likely to promote the development and adoption of food-grade and medical-grade rigid packaging solutions.
