The Saudi Arabia dengue testing market was valued at USD 624.35 thousand in 2025 and is projected to grow from USD 654.00 thousand in 2026 to reach USD 889.83 thousand by 2033, growing at a CAGR of 4.50% from 2026 to 2033. The market is driven by the increasing prevalence of dengue infections, particularly in western and southern regions such as Jeddah, Makkah, and Jazan.

Rising mosquito-borne disease surveillance activities and growing awareness of early diagnosis are increasing demand for accurate dengue testing methods, including RT-PCR, ELISA, NS1 antigen testing, and rapid diagnostic tests (RDTs).
