## Abstracts

The global shot blasting machine market size was estimated at USD 1,283.9 million in 2024 and is projected to reach USD 2,016.7 million by 2033, growing at a CAGR of 5.3% from 2025 to 2033. The market is driven by the rising demand for surface preparation in the automotive, aerospace, construction, and foundry industries.

These machines help clean, strengthen, and polish metal surfaces, which enhances product durability and performance. Increasing adoption in the shipbuilding and defense sectors for rust removal and coating applications further supports market growth. Another key driver is the rising industrialization and infrastructure development across emerging economies, leading to higher consumption of metals and fabricated components.

Governments' focus on improving manufacturing output through initiatives like "Make in India" and "Made in China 2025" has spurred equipment demand. The shift toward robotic and environmentally friendly blasting machines is gaining traction, as industries seek reduced operational costs and compliance with strict safety regulations. This trend is expected to boost the market outlook over the coming years.
