Abstracts

The global silicone in the personal care market size was estimated at USD 3.6 billion in 2025 and is projected to reach USD 5.6 billion by 2033, growing at a CAGR of 5.5% from 2026 to 2033. The increasing consumerism and disposable income have raised the demand for self-care products, which has grown the demand for silicon in producing products such as shampoos, conditioners, serums, sunscreens, body lotions, lipsticks, eyeliners, concealers, and various other goods.

Another notable trend in the silicone in personal care market is the increasing focus on lightweight, multifunctional, and high-performance ingredients that improve texture, spreadability, and product stability. Rising urbanization is increasing demand for convenient personal care products suited to busy lifestyles, driving the use of silicones in skincare, haircare, and cosmetics. Consumers are also seeking premium and sensory-rich formulations, encouraging manufacturers to develop advanced silicone-based products that deliver smooth application, long-lasting effects, and better overall user experience.
