Abstracts

The Singapore dietary supplements market size was valued at USD 618.0 million in 2025 and is projected to grow from USD 653.9 million in 2026 to USD 978.6 million by 2033, at a CAGR of 5.9% from 2026 to 2033. Market growth is increasingly supported by a shift toward proactive health management and greater consumer focus on maintaining overall well-being, while demand is also expanding for supplements aligned with specific health goals, dietary needs, and lifestyle requirements.

Consumers are becoming more proactive about maintaining their health and increasingly using supplements to support their nutritional needs, energy, digestive, and bone and joint health, and other specific health requirements. Singapore's aging population, rising health awareness, and busy urban lifestyles are also supporting demand for convenient supplement formats such as gummies, powders, tablets, capsules, and ready-to-consume products. In addition, the growing focus on personalized nutrition and targeted health solutions is creating opportunities for supplements designed for specific age groups and health needs.

These trends are encouraging manufacturers to introduce innovative products and expand their presence in Singapore through new formats, targeted formulations, and digital sales channels. For instance, Singapore-based health and wellness companies such as Eu Yan Sang continue to offer a broad range of health supplements and

wellness products targeted at different consumer needs, including immunity, digestive health, bone health, and general well-being. The availability of such products through pharmacies, specialty health stores, supermarkets, and online platforms is making dietary supplements more accessible to consumers. As preventive healthcare and everyday wellness become increasingly important, manufacturers are likely to expand their product portfolios with convenient, scientifically formulated, and targeted supplements to reach a broader consumer base.

Singapore Dietary Supplements Market Report Segmentation

This report forecasts revenue growth at the country level and provides an analysis of the latest industry trends and opportunities in each of the sub-segments from 2021 to 2033. For the purpose of this study, Grand View Research has segmented the Singapore dietary supplements market report on the basis of ingredient, form, type, application, end use, and distribution channel, alongside cross-segments for ingredient-form, ingredient-end use, and application-ingredient.
