## **Abstracts**

The global smart grid market size was estimated at USD 66.7 billion in 2025 and is projected to reach USD 228.4 billion by 2033, growing at a CAGR of 16.7% from 2026 to 2033. The market is witnessing steady expansion driven by rising electricity demand, increasing integration of renewable energy sources, and the modernization of aging grid infrastructure across developed and emerging economies.

Smart grid systems, enabled by advanced metering infrastructure (AMI), grid automation, and real-time data analytics, offer enhanced grid reliability, operational efficiency, and improved demand-side management compared to conventional power networks. Their growing adoption across utilities, residential, commercial, and industrial sectors is accelerating global demand, particularly in regions implementing digitalization strategies and ambitious energy transition targets.
