The South East Asia nutraceutical excipients market size is expected to reach USD 1.03 billion by 2025 at an 8.22% CAGR, according to a new report by Grand View Research, Inc. Increasing health consciousness and consequently increasing demand for nutraceuticals among consumers in South East Asia (SEA) are expected to drive market growth.

South East Asian countries are recognized as hubs for innovation as far as new ingredients and functional foods are concerned. Major changes in urban lifestyle, high dependence on domestic consumption, and rising disposable income of consumers are key factors boosting the nutraceutical industry in these counties.

Many international nutraceutical manufacturers seek entry into the SEA market owing to the high potential for revenue generation through consumer behavior patterns in this region. For instance, in January 2018, ChromaDex introduced its TRU NIAGEN supplement in Singapore through retail partnerships with Watsons. It is the first and only commercial form of nicotinamide riboside, which supports healthy aging by providing protection against cellular stress, boosting energy, and inducing DNA repair.

Countries like Myanmar, Indonesia, and Philippines present higher prevalence of health issues such as hypertension, obesity, and diabetes, thus exhibiting demand for nutraceutical products. Rising investments by multinational nutraceutical manufacturers

in this region are also expected to drive demand for local excipient suppliers.

Furthermore, governments of countries in this region are making efforts to introduce more harmonized regulations for the pharma and nutraceutical industry. Better regulatory standards are expected to enhance penetration of nutraceutical excipient manufacturers in the coming years.

Further key findings from the report suggest:

The South East Asia nutraceutical excipients market is driven by players such as Roquette, Dow Chemical Company, SGS, and Azelis

Film coating excipients held largest revenue share owing to rapid adoption in tablet formulations to overcome key challenges in nutraceutical manufacturing

Growing demand for low-calorie sugar substitutes to overcome undesirable taste of most nutraceuticals is attributive to the fastest growth of the sugars and polyols segment

Thailand is projected to witness the fastest growth owing to changing trends in the health and wellness industry. Government initiatives such as the Universal Coverage Scheme further contribute to market growth

International companies seek entry into the market through distribution partnerships with local players or establishment of subsidiaries in prominent markets

Some key players in the South East Asia nutraceutical excipients market are SPI Pharma; DuPont Nutrition and Health; The Dow Chemical Company; Barentzk; Cargill Inc.; BASF SE; JRS Pharma; BEHN MEYER; and Sensient Colors LLC.
