## Abstracts

The South Korea flavors market size was estimated at USD 641.9 million in 2024 and is projected to reach USD 1,005.6 million by 2033, growing at a CAGR of 5.0% from 2025 to 2033. This growth is driven by changing consumer habits and a strong culture of culinary innovation.

Rapid urbanization and busy work schedules have pushed the demand for convenient foods such as ready-to-eat meals, instant noodles, and packaged snacks, which depend on differentiated flavors to keep consumers engaged.

Young consumers fuel the demand for hybrid tastes that blend traditional ingredients such as kimchi, garlic, and fermented sauces with international cuisines. This trend has strengthened the market for gourmet, premium, and limited-edition products as brands compete to offer unique taste experiences.

Health and clean-label trends further support market growth. Consumers prefer products with natural extracts, fermented notes, and functional ingredients, especially in beverages and dairy alternatives. The widespread reach of convenience stores helps flavored products reach a broad consumer base quickly.
