The global soy chemicals market size was valued at USD 34.4 billion in 2025 and is projected to grow from USD 36.8 billion in 2026 to USD 61.1 billion by 2033, growing at a CAGR of 7.5% from 2026 to 2033. North America accounted for the largest share, 36.3%, of the global soy chemicals industry in 2025. Rising demand for biodegradable and renewable industrial materials is driving market growth.

Industries are increasingly adopting soy-based ingredients in coatings, lubricants, adhesives, and plastics to reduce environmental impact and dependence on petroleum-derived chemicals. Market growth is further supported by expanding soybean processing capacities, increasing biofuel production, and growing investments in sustainable chemical technologies. A strong focus on low-VOC, eco-friendly formulations is also accelerating product adoption across industrial sectors.

The market is creating significant opportunities in bioplastics, green packaging, and bio-based specialty chemicals. Increasing sustainability initiatives and rising preference for renewable raw materials are encouraging manufacturers to develop innovative soy-derived industrial solutions.
