Surface Disinfectant Market Growth & Trends

The global surface disinfectant market size is expected to reach USD 9.5 billion by 2030, registering a CAGR of 6.3% over the forecast period, as per the new report by Grand View Research, Inc. The market growth is majorly driven by the increasing commonness and consumption of Healthcare-Associated Infections (HAIs). The future growth can be attributed to several factors, which include rising infrastructure & construction activities, automotive & industrial production, travel (business and leisure) activities, as well as the need to maintain cleanliness at every location. Furthermore, the growing demand for green solutions, such as biobased surface disinfectants, continues to contribute to the global market growth.

The institutional, industrial, residential, and commercial sectors are estimated to generate significant product demand in the coming years. Market consumers largely include the automobile, transportation, food & beverage, hospitality & restaurant industries and processing facilities (poultry and meat hygiene), provincial authorities, building service contractors & cleaning companies, municipalities, retail (supermarkets) sector, hospitals, and multiple other commercial facilities. The global market was positively impacted by the COVID-19 pandemic in the first half of 2020 and even in 2021 due to high product demand from hospitals. The growing awareness regarding

cleanliness and hygiene along with the re-opening of public places, such as educational institutes, cafes, hotels, malls, and restaurants, further boosted the market growth.

Surface Disinfectant Market Report Highlights

The spray form segment is estimated to register the fastest CAGR from 2022 to 2030 due to the rising product application on multiple border objects, especially in the wake of the COVID-19 pandemic

In-house was the dominant application segment in 2021 and is estimated to continue leading the market registering the fastest CAGR from 2022 to 2032

This is because of the inclusion of the product in household cleaning activities, such as glass, hard floor, carpet, and surface cleaning

The Hotel/Restaurants/cafe (HORECA) end-use segment led the market in 2021 and is projected to register the fastest CAGR during the forecast period

This growth is credited to the rising product demand from restaurants, hotels, and cafes for time-to-time cleaning and disinfecting activities

Biobased products are estimated to be the fastest-growing types owing to the rising awareness among people about the toxicity and environmental hazards of chemical-based products

Asia Pacific is estimated to be the fastest-growing regional market from 2022 to 2030 due to factors like rising public awareness regarding health & hygiene
