## Abstracts

The global surface disinfection systems market size was estimated at USD 3,097.3 million in 2025 and is projected to reach USD 5,150.5 million by 2033, growing at a CAGR of 6.7% from 2026 to 2033. The market is mainly driven by the growing focus on infection prevention and hygiene standards across healthcare, pharmaceutical, and commercial facilities.

Rising cases of healthcare-associated infections (HAIs) and stricter regulatory requirements are pushing hospitals, cleanrooms, and laboratories to adopt automated and high-efficiency disinfection technologies such as UVC and hydrogen peroxide vapor systems.

Another key factor is the shift toward automated, touchless, and time-efficient disinfection solutions. Facilities are looking to reduce manual labor, ensure consistent coverage, and minimize chemical exposure, which is accelerating demand for robotic UVC systems, electrostatic sprayers, and fogging technologies. Expanding applications in transportation, food processing, and commercial buildings, along with continuous technological advancements improving safety and effectiveness, are further supporting long-term market growth.
