## **Abstracts**

The global surgical gloves market size was valued at USD 2,144.8 million in 2025 and is expected to reach USD 3,755.9 million by 2033, growing at a CAGR of 7.3% from 2026 to 2033. Due to increasing surgical procedures, rising awareness of infection control, and strict healthcare safety standards.

Demand is supported by the growing prevalence of chronic diseases and expanding healthcare infrastructure, particularly in emerging economies. The need for disposable and sterile products to prevent cross-contamination is further boosting adoption.

Technological advancements, including improved material quality such as nitrile and latex alternatives, are enhancing comfort and durability. Additionally, heightened focus on hygiene following global health concerns continues to sustain demand. Government regulations and hospital compliance requirements are also encouraging consistent usage, while rising investments in healthcare facilities are contributing to long-term market expansion.
