Consumers seek easy-to-consume, fast-absorbing products that complement busy lifestyles. The continuously expanding portfolio of liquid supplements, including multivitamins, vitamin C, vitamin E, and fish oil, among others, caters to diverse health needs, further fueling market growth.

According to a report published by Trading Economics, in 2024, 20.6% of Sweden's population was aged 65 or older, highlighting a rapidly aging society with growing nutritional needs. Aging adults often face reduced nutrient absorption from daily meals and experience difficulty in swallowing tablets, making liquid formulations a convenient and more bioavailable option, particularly for vitamin D and calcium, which are essential for bone health. Owing to the convenience and faster absorption, the appeal of liquid dietary supplements is growing among the geriatric population. In addition to such clinical needs, Swedish consumers maintain a strong preventive health culture, favoring clean-label, plant-based, and functional liquid supplements such as immunity shots and fortified tonics. Liquid dietary supplements align precisely with the preferences of health-conscious and time-sensitive consumers, thus encouraging the demand for such supplements.
