Switzerland MPS Market Size & Trends

The Switzerland managed print services market size was estimated at USD 415.6 million in 2024 and is projected tgrow at a CAGR of 10.3% from 2025 t2030. The market growth can be attributed tthe increasing demand for cost-efficient printing solutions and streamlined document workflows, the growing adoption of digital transformation initiatives across various industries, and the subsequent shift toward managed services toptimize printing processes and reduce environmental impact. Rising concerns over data security in document management are alsdriving the adoption of MPS. On the other hand, the integration of AI-enabled solutions, cloud-based printing, and analytics, among other advanced solutions, is transforming the market landscape and opening new opportunities for market players.

The adoption of cloud-based solutions alscontributes tthe managed print services (MPS) market's growth. With the increasing shift toward digital transformation, businesses are adopting cloud-based document management systems that integrate with their printing infrastructure. MPS providers leverage the cloud toffer more scalable, flexible, and efficient print management solutions. Cloud integration enables businesses

tmanage their print operations remotely, monitor usage, and gain real-time insights intprinting activities. Furthermore, cloud-based MPS solutions can be easily scaled tmeet the needs of growing organizations, adding tthe appeal of MPS for businesses of all sizes. For instance, in February 2024, Xerox Corporation launched new solutions and services tenhance digital transformation, productivity, and security in the hybrid workplace while streamlining time management and minimizing IT complexities. Xerox MPS features cloud-native printer fleet maintenance, supplies management, and au

tomated driver deployment for any printer brand. This cloud-first approach is tailored taccommodate the needs of clients of all sizes. Updates tfleet security management allow for detecting suspicious activities, enabling quick responses tpotential incidents.

The rise of remote and hybrid work models has alsaccelerated the adoption of MPS. As companies adopt flexible work environments, ensuring employees have access tprint resources regardless of location has become essential. MPS providers offer solutions that cater tthis new way of working, allowing employees tprint from home, in satellite offices, or on the gwhile maintaining centralized control and monitoring. This flexibility has made MPS a valuable solution for businesses with remote or dispersed workforces. According tZoom VideCommunications, in 2024, professionals working in a hybrid model have increased engagement rates, at 35%, compared tthose whare fully remote, at 33%, and in-office employees, at 27%.

The rise in small and medium-sized enterprises (SMEs) in Switzerland alscontributes significantly tthe growth of the MPS market. SMEs often lack the resources tmanage complex print environments independently, making them prime candidates for outsourcing their print management tMPS providers. Tailored MPS solutions for SMEs focus on reducing costs, simplifying device management, and providing access tadvanced features without substantial upfront investments. This democratization of advanced print technology enables smaller organizations tcompete with larger firms by enhancing efficiency and reducing operational burdens. According tthe Federal Statistical Office (FSO) of Switzerland, Small and Medium-sized Enterprises (SMEs) form the backbone of the Swiss economy. In 2021, they employed nearly 3.1 million individuals, marking an increase of 64,000 jobs compared t2020. Over the decade from 2011 t2021, the share of enterprises with fewer than ten employees grew.
