Tattoo Removal Devices Market Growth & Trends

The global tattoo removal devices market size is anticipated to reach USD 289.6 million by 2030, according to a new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 9.6% from 2022 to 2030. Increasing demand for removal of tattoos among both youth and senior population alike due to tattoo regret and high demand for non-invasive or minimally invasive procedures for aesthetic treatment are some of the key market growth drivers. Laser devices such as Q-Switched Nd-YAG laser, Q-switched ruby laser, and Q-Switched Alexandrite laser systems are highly efficient and safe for removal of both black and colored tattoos and thus are anticipated to facilitate market growth.

Moreover, according to Astanza Lasers, approximately 45.0 million Americans have at least one tattoo, and nearly 21,000 tattoo parlors in the U.S. generate a potential tattoo removal patient each day, thus significantly boosting the market demand. Furthermore, the average revenue per patient is around USD 1,400 and with nearly 7 million individuals with tattoo regret, the market is anticipated to present huge opportunities for market players and investors.

In light of COVID-19, the market faced losses as the footfall of patient appointments for

aesthetic treatments was temporarily suspended. However, since governments in many countries have allowed resuming elective aesthetic procedures, tattoo removal procedures have resumed. Moreover, according to the BBC network, inquiries and appointments for many non-surgical cosmetic treatments have seen a surge following the pandemic and are thus expected to propel market growth.

Tattoo Removal Devices Market Report Highlights

Some of the most common reasons for individuals seeking tattoo removal are fading of the tattoo over time, poor work quality of tattoo, and tattoo hindering job acceptance

The laser removal devices segment dominated the market in 2021 since laser therapy is the only safe, effective, and non-invasive tattoo removal procedure

Dermatology clinics are highly preferred by individuals for both getting inked and removal of tattoos due to the availability of advanced devices and the presence of certified and trained dermatologists

North America leads the market due to the presence of a large number of tattoo parlors, availability of advanced devices, and presence of a large number of tattooed individuals

In Asia Pacific, the market is expected to grow fast over the forecast period due to the high importance of dragon tattoos in China and the growing demand for tattoos in Japan and India
